

```
UniDec.import_wizard.Import  
Wizard.export_then_load
```

```
graph LR; A["UniDec.import_wizard.Import  
Wizard.export_then_load"] --> B["UniDec.import_wizard.Import  
Wizard.auto"]
```

A diagram illustrating a transformation in code. On the left, a gray rectangular box contains the code `UniDec.import_wizard.Import` and `Wizard.export_then_load`. A blue arrow points from this box to a white rectangular box on the right. The white box contains the code `UniDec.import_wizard.Import` and `Wizard.auto`. This represents a change from manually exporting and then loading to using an automatic wizard.

```
UniDec.import_wizard.Import  
Wizard.auto
```
